

**Notes:**

- Controllit GS - electrically conductive underlay 165 gsm.
- Reaction-to-fire behavior A2.
- Electrical resistivity < 1000 Ohms/sq .
- Controllit underlay provides waterproofing scanning quickly and non-destructively using the high voltage electronic leak detection (ELD) method. For non-conductive waterproofing membranes.
- Install right under inspectable waterproofing.
- Controllit connection contacts provide connection between inspection device and electrically conductive Controllit underlay.
- The base of Controllit connection contact must be connected with the electrically conductive Controllit underlay.
- All connection contacts must be in the zone of lightning protection.
- To ensure the watertightness of contact, a special collar for bitumen must be used.

**Title of drawing:**  
Parapet connection contact V2 - bitumen waterproofing
