# CONTROLIT CONNECTION STRIPE APPLICATION

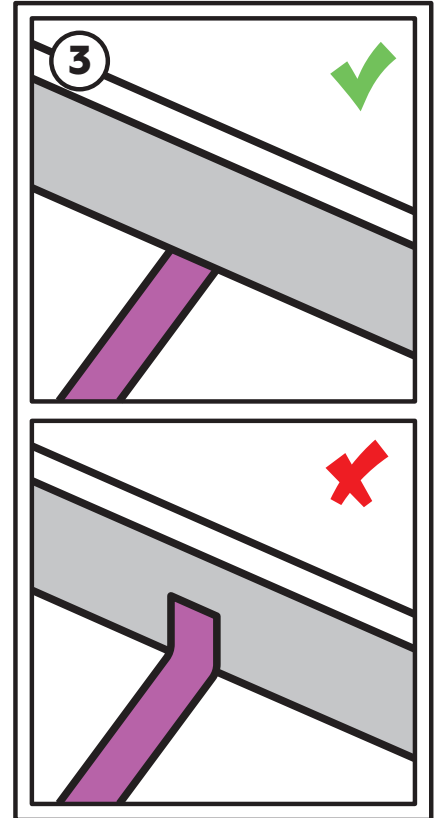

1. Controlit connection stripes must be freely rolled on horizontal surface only.

2. When you need to connect new roll of connection stripe, align it next to the other with an indent of 50 cm.

4. **IMPORTANT!** Connection stripes must always be placed perpendicular to the direction of the Controlit as shown in visualisation.

3. Controlit connection stripes must be rolled on horizontal surface only  
Controlit connection stripes **are not** applied on vertical surfaces!

**IMPORTANT!** On smaller roofs where placement of Connection stripes every 15 m are impossible, must place minimum 2 stripes. (See the red dashed line area in visualisation of page nr. 1)
